DETAILED ACTION

Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-48 are rejected under 35 U.S.C. 102(b) as being anticipated by Marnell, II 1. ("Marnell") (U.S. 5,393,057).

Marnell discloses an electronic gaming apparatus including an electronic primary gaming device, such as a slot machine and an electronic secondary gaming device, such as a bingo-type device. The slot machine is electrically coupled to the electronic secondary gaming device, and the slot machine is responsive to the occurrence of selected events, such as coin/credit inputs and slot machine reel combinations, for input into the secondary gaming device. Consequently, the occurrence of symbols obtained on the slot machine reels produces selection of a space in the bingo matrix of a bingo-type gaming device. A plurality of slot machines can be electrically coupled, to a common bingo gaming device for simultaneous play of a single bingo game by a plurality of players, each of whom is playing his or her own individual slot machine game. Moreover, players may play for a progressive prize which is incremented as a function of, or in proportion to, the coin/credit in to the slot machines. Marnell requires a minimum bet to be eligible for the progressive prize. A player obtains a progressive prize by filling or partially filling a bingo matrix. Furthermore, a player may obtain an award based upon the outcome obtained in the base slot machine game. Marnell additionally discloses:

Regarding Claims 1, 10, 19, 26, 33, and 42:

A method for conducting a wagering game and an associated progressive jackpot, comprising:

Application/Control Number: 10/755,982

Art Unit: 3714

• receiving a deposit of an amount of a medium of currency by a player at a gaming unit (4:19-20, 46-56, 5:39-55, 6:43-47);

Page 3

- receiving input for a player's wager on an occurrence of the wagering game at an input device of the gaming unit (4:19-20, 46-56, 5:39-55, 6:43-47);
- subtracting the amount of the player's wager on the occurrence of the wagering game from the player's available credit at the gaming unit in response to receiving the input for the player's wager, wherein the player's available credit corresponds to the amount of the medium of currency deposited at the gaming unit (4:19-20, 46-56, 5:39-55, 6:43-47); Although Marnell does not recite the exact language, Marnell inherently subtracts the amount of a player's wager and the progressive amounts, otherwise, Marnell would not operate as intended.
- comparing the amount of the player's wager on the occurrence of the wagering game to a minimum wager amount (4:19-20, 46-56, 5:39-55, 6:43-47);
- subtracting a progressive jackpot wager amount from one of the player's available credit and the credits subtracted from the player's available credit if the player's wager is greater than or equal to a minimum wager amount (at least 3 coins/credits for instance) (4:19-20, 46-56, 5:39-55, 6:43-47); Although Marnell does not recite the exact language, Marnell inherently subtracts the amount of a player's wager and the progressive amounts, otherwise, Marnell would not operate as intended.
- adding the progressive jackpot wager amount to a progressive jackpot pool for the progressive jackpot (4:63-5:4);
- determining an outcome for the player for the occurrence of the wagering game (6:14-27); and

Art Unit: 3714

awarding at least a portion of the progressive jackpot pool to the player if the player's
outcome for the occurrence of the wagering game is a predetermined progressive jackpot
winning outcome and the player's wager is greater than or equal to the minimum wager
amount (6:14-27 and 10:7-26).

Regarding Claims 2, 11, 20, 27, 34, and 43:

A method for conducting a wagering game and an associated progressive jackpot in accordance with claim 1,

wherein the wagering game is a multi-player wagering game wherein each player has a unique game array of game indicia (bingo card/bingo numbers) for the occurrence of the wagering game and individual game indicia are sequentially selected from the range of game indicia, wherein one of the players wins the occurrence of the wagering game by matching a predetermined game winning pattern of game indicia on the player's unique game array with the sequentially selected game indicia, and wherein the outcome of the occurrence of the wagering game is a predetermined progressive jackpot winning outcome if a pattern on the player's unique game array formed by game indicia on the unique game array matching sequentially selected game indicia matches a predetermined progressive jackpot winning pattern (2:63-68, 4:63-5:7, 5:61-68, 6:18-27, 43-65, 9:49-10:23).

Regarding Claims 3, 12, 21, 28, 35, and 44:

A method for conducting a wagering game and an associated progressive jackpot in accordance with claim 2,

wherein the outcome of the occurrence of the wagering game is a predetermined
 progressive jackpot winning outcome if the player matches the predetermined progressive

Application/Control Number: 10/755,982

jackpot winning outcome within a predetermined maximum number of sequentially selected game indicia (2:63-68, 4:63-5:7, 5:61-68, 6:18-27, 43-65, 9:49-10:65).

Regarding Claims 4, 13, 22, and 36:

A method for conducting a wagering game and associated progressive jackpot in accordance with claim 1,

• comprising subtracting the progressive jackpot wager amount from the player's available credit (4:19-20, 46-56, 5:39-55, 6:43-47); Although Marnell does not recite the exact language, Marnell inherently subtracts the amount of a player's wager and the progressive amounts, otherwise, Marnell would not operate as intended.

Regarding Claims 5, 14, and 37:

A method for conducting a wagering game and associated progressive jackpot in accordance with claim 1,

• comprising subtracting the progressive jackpot wager amount from the credits subtracted from the player's available credit (4:19-20, 46-56, 5:39-55, 6:43-47); Although Marnell does not recite the exact language, Marnell inherently subtracts the amount of a player's wager and the progressive amounts, otherwise, Marnell would not operate as intended.

Regarding Claims 6, 15, 29, 38, and 45:

A method for conducting a wagering game and associated progressive jackpot in accordance with claim 1,

 wherein the progressive jackpot wager amount is equal to a predetermined fixed wager amount (5:37-50).

Regarding Claims 7, 16, 23, 30, 39, and 46:

Application/Control Number: 10/755,982

Art Unit: 3714

Page 6

A method for conducting a wagering game and associated progressive jackpot in accordance with claim 1,

• wherein the progressive jackpot wager amount is equal to a predetermined percentage of the player's wager for the occurrence of the wagering game (5:37-50). This feature is inherent to the wager in the game. That is, if a maximum bet is required in order to play for the progressive jackpot, then the predetermined amount is equal to a predetermined percentage of the maximum wager input by the player.

Regarding Claims 8, 17, 24, 31, 40, and 47:

A method for conducting a wagering game and associated progressive jackpot in accordance with claim 1,

• comprising displaying graphics corresponding to an outcome of the player's progressive jackpot wager at the gaming unit if the player's wager is greater than or equal to the minimum wager amount (2:63-68, 4:63-5:7, 5:61-68, 6:18-27, 43-65, 9:49-10:23).

Regarding Claims 9, 18, 25, 32, 41, and 48:

A method for conducting a wagering game and associated progressive jackpot in accordance with claim 1,

wherein the minimum wager amount is equal to the maximum wager that the player may make for an occurrence of the wagering game (5:37-50). The minimum wager amount that is required to play for the progressive prize may be the maximum wager required to play the slot machine game.

Art Unit: 3714

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Scott E. Jones whose telephone number is (571) 272-4438. The examiner can normally be reached on Monday - Friday, 8:30 A.M. - 5:00 P.M..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert E. Pezzuto can be reached on (571) 272-6996. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
